

Uchida Air Jogger series

UCHIDA

Perfect jogging Performed
Quickly with the Air Blower

AJ-700 & AJ-740i

UCHIDA YOKO GLOBAL LIMITED

Ideal paper handling.

Neat jogging rapidly achieved with the powerful air blower.

Thanks to the high-power air blower, which is the most powerful in its class, the AJ-700 & AJ-740i reliably jogs unevenly arranged papers very quickly.

It prevents the paper from becoming soiled by blowing air between the sheets.

Quick Drying of Ink and Elimination of Static.

Wet ink can be rapidly dried by the effect of the air, which is even more effective in the case of two-sided printing. It is also effective for elimination of static electricity and powder stayed on the paper after printing.

Various Job Modes.

Jogging strength and air volume are adjustable according to paper quantity and quality. In addition, the AJ-700 & AJ-740i can operate in various modes such as air only, jogger only, reset timer operation and the time interval difference mode (continuous jogging for a preset period after the air has stopped).

Remove electrostatic in 3 seconds with AJ-740i.

Controlling electrostatic is becoming bigger and bigger issue with today's digital printing. Heavy static generated by a digital printer causes a lot of problem when you finish the prints. AJ-740i has the powerful anti-static ionizer, which eliminates heavy static in a few seconds. This is the ideal solution after printing, before finishing.
